TAKING STEPS TO CURE CYSTIC FIBROSIS

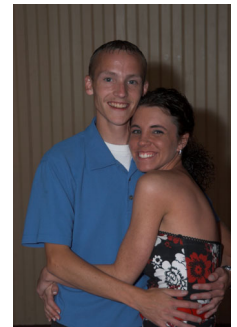

footnotes

VOLUME 2, ISSUE 1

March 10, 2008

New Additions to the GREAT STRIDES Family!

Kara Bauereis is her husband's biggest fan and most devoted supporter. He is in his second year of medical school at the University of Kentucky and she is proud of his 4.0 GPA. But, she knows that medical school cannot be his only focus. Kevin has CF and to succeed in medical school, he must also focus on his health. She plays a big part of helping him do that. She makes sure he makes time for his breathing treatments, eats well to keep up his weight and doesn't spend too many nights studying until dawn. They both work hard to keep him healthy and she thankful he has been hospitalized only once in the year and a half they have been married. She does all she can to make sure that cystic fibrosis is not an obstacle to fulfilling his dream of becoming an anesthesiologist and one day practicing at Cincinnati Children's Hospital Medical Center.

Kara has formed **Kevin's Team** and they will be walking in the Great Strides Northern Kentucky walk. She and Kevin grew up in Hebron and graduated from Conner High School. He is a graduate of Northern Kentucky University. She graduated from Gateway Community College and plans to start nursing school when Kevin begins his residency. They are coming back home on May 17 to walk with the friends and family who have been with Kevin and his brother, David, who also has CF, every step of the way.

Kara's goal is to raise a **minimum of \$3,000** for her first Great Strides team. "I hope the money I help to raise will enable the CF Foundation to take full advantage of the research opportunities that are on the horizon. Any one of the research projects underway could have a profound impact on the lives of those living with the disease. The only thing standing in the way of a cure is the money to fund this life-saving research," says Kara.

Look for "Doc" Kevin and his team and welcome them to the Great Strides family!
