Cystic Fibrosis Foundation

The Cystic Fibrosis Foundation is one of the most efficient voluntary health organizations of its kind. It has received a four-star rating for sound fiscal management from Charity

Navigator, the largest independent charity evaluator in the United States, and is an accredited charity of the Better Business Bureau's Wise Giving Alliance.

The Cystic Fibrosis Foundation has fueled dramatic improvements in research and care that have significantly changed the prognosis for people with CF. To quicken the pace of drug discovery and development, the Foundation has pioneered an innovative and high effective business model using the same results-driven approach of a for-profit company. The Foundation has committed hundreds of millions of dollars in collaboration with the biotech industry to fuel the search for new treatments and a cure.

The Foundation's unique approach to drug discovery has yielded a therapeutics pipeline with more than 30 potential drug therapies in development for CF. Virtually every approved CF drug available today was made possible because of Foundation support.

The Foundation's Care Center

Network consisting of approximately 117 care centers and 50 affiliate programs nationwide, ensures that people with CF receive the best possible care—no matter where they live.
