Because of risks to people with cystic fibrosis (CF), individuals with a confirmed positive sputum culture for *Burkholderia cepacia* complex **shall not attend** this event. This is because *B. cepacia* can be passed between individuals who have CF through close proximity. *B. cepacia* infection in a person with CF can cause serious respiratory illness and, in some patients, may lead to death. Despite this policy, there might still be some individuals with *B. cepacia* in attendance. *B. cepacia* is not a risk for otherwise healthy individuals. For alternative ways to participate and for information about this policy, please contact the CF Foundation at (800) FIGHT-CF or visit our Web site at www.cff.org. Consult your CF care center physician with medical questions.

GO

Vertical

The Stair Climb raises funds towards much needed cystic fibrosis (CF) research. CF is a life-threatening genetic disease that affects the lungs and digestive systems of over 30,000 children and adults. In 1955, when the CF Foundation was established, children with CF did not live to attend elementary school. Today, thanks to wise investments made by the CF Foundation in innovative research and comprehensive care, the median age of survival for a person with CF is over 37 years.

In 2007, nearly 90 cents of every dollar of revenue raised was available for investment in CF research, care, and education programs.

To help us continue this positive momentum please raise additional funds above the entry fee. You might win one of these great prizes!
