## **“Diamond in a Pearl”**

When an oyster swallows a grain of sand it experiences discomfort. It begins to coat the grain of sand with nacre to ease the pain. During this healing process a lustrous pearl is created. Isn't it ironic that something so beautiful is the result of such pain?

This irony is very much like life itself. It is easy for us to love in good times, but it takes courage to love through the painful and difficult times.

A “Diamond in a Pearl” is an expression of love.

The diamond represents the grain of sand, the pain.

The pearl represents the courage and healing which comes from love.

Love has the power to heal all wounds.

The “Diamond in a Pearl” pendant is a 9.5 mm Black Tahitian Pearl that has been laser cut into a Rose. In its center, set in 18k white gold, is a 20 pt round brilliant diamond. It is featured on an 18 inch, 18K white gold chain.

**Retail Value \$2500**

**Prize Drawing Tickets only \$25**

**Thank You**
