

Elevator Speech

My [daughter/son/spouse/friend/other] has cystic fibrosis.

[Explain what living with CF is like — depending on how much time you have. Make it your own.]

I volunteer with the Cystic Fibrosis Foundation. Fifty years ago, kids with CF didn't live long enough to attend kindergarten.

Today, because of the Foundation's work, some people with CF are attending college, getting married, and having children — goals that used to seem impossible. But many are still dying far too young.

The Foundation has transformed how the disease is treated and is working to find a cure for all people with CF.

It's an amazing thing to be a part of, but a cure is a long way away and we still need so much support.
