Re: Delaware Section 1332 State Innovation Waiver

Commissioner Navarro:

On behalf of people with cystic fibrosis, the Cystic Fibrosis Foundation appreciates the opportunity to support Delaware’s 1332 State Innovation Waiver application to operate a reinsurance program.

Cystic fibrosis (CF) is a life-threatening genetic disease that affects 30,000 children and adults in the United States. CF causes the body to produce thick, sticky mucus that clogs the lungs and digestive system, which can lead to life-threatening infections. As a complex, multi-system condition, CF requires targeted, specialized treatment and medications.

People with CF benefit from insurance marketplaces that offer affordable health plans that cover their complex health needs. The Cystic Fibrosis Foundation supports Delaware’s creation of a reinsurance program that will make coverage more affordable and expand plan choice by encouraging insurer participation in the marketplace.

Reinsurance is an important tool to help stabilize health insurance markets. Reinsurance programs help insurance companies cover the claims of very high cost enrollees, which in turn keeps premiums affordable for other individuals buying insurance on the individual market. These programs have been used to stabilize premiums in a number of healthcare programs, including Medicare Part D. A temporary reinsurance fund for the individual market was also established under the Affordable Care Act and reduced premiums by an estimated 10 to 14 percent in its first year. A recent analysis by Avalere of the seven states that have created their own reinsurance programs through Section 1332 waivers found that these states reduced individual market premiums by an average of 19.9 percent in their first year. Additionally, after Minnesota received approval to implement its reinsurance program, insurers proposed rates for 2019 that were between 3 and 12.4 percent below 2018 premiums.

The Cystic Fibrosis Foundation appreciates the opportunity to provide input on these important policy changes and supports your efforts to stabilize the marketplace through reinsurance. As the health landscape continues to

---

evolve, we look forward to working with the state of Delaware to ensure high quality, specialized CF care and improve the lives of all with cystic fibrosis. Please consider us a resource moving forward.

Sincerely,

Mary B. Dwight
