Program Name: Path to a Cure (PTAC): Industry Award with Letter of Intent (LOI)

Brief Program Overview/Description: The Path to a Cure is the Foundation’s research program to support development of treatments for the underlying cause of the disease and, ultimately, a cure for every person with CF. The Foundation has made an initial commitment of $500 million through 2025 for these efforts and is challenging potential collaborators to submit proposals that will accelerate the pace of progress for CF drug discovery and development.

Funding Amount: The level of awards given through the Path to a Cure Initiative are expected to be substantially higher than those through the regular CFF Therapeutic Development Award (TDA) program, potentially up to tens of millions of dollars. Contract terms are negotiated prior to finalization of the agreement.

Eligibility:
• Both U.S.-based and non-U.S. based (i.e. international) companies engaged in research and development are welcome to apply.
• Awards may be made for either discovery, platform development for gene delivery and editing strategies, preclinical and/or clinical development activities that support development of treatments that address the underlying cause of CF.
• It is recommended that projects be conducted in consultation with CF scientists/investigators knowledgeable in the specific aspects of the project.
• Additional eligibility requirements can be found in Section IV below.

Key Dates:
- Published: February 24, 2021
- LOI Submission Deadline: Rolling
- LOI Applicant Notified: Generally within 2 weeks of receipt
- Full Application Deadline: Rolling
- Committee Review Date: Ad-hoc basis
- Full Application Notification: Funding decision goal of 4 months after receipt
- Earliest Project Start Date: Ad-hoc basis

VII. Review and Award
VIII. Submission Information
IX. Letter of Intent Guidelines
X. Full Application Guidelines
XI. Other Information
XII. Contact Information
I. About the Cystic Fibrosis Foundation
The mission of the Cystic Fibrosis Foundation is to cure cystic fibrosis and to provide all people with CF the opportunity to lead long, fulfilling lives by funding research and drug development, partnering with the CF community, and advancing high-quality, specialized care.

II. Program and Award Overview
In an effort to stimulate development of new pharmaceutical products focused on development of treatments that address the underlying cause of and, ultimately, a cure for every person with CF, the CFF has initiated its Path to a Cure funding mechanism. The Foundation has allocated $500 million through 2025 for these “Path to a Cure” efforts and is challenging potential collaborators to submit proposals that will accelerate the pace of progress for CF drug discovery and development in described areas. Structured as a matching award program, funds awarded are expected to be matched by the recipient.

Industry programs supported through the Path to a Cure will focus on two core strategies to address the underlying cause of CF:
- Restoring CFTR protein when none exists, including that from nonsense mutations
- Fixing or replacing the underlying genetic mutation to address the root cause of CF through gene replacement/transfer, gene editing approaches, or stem cell therapy.

In addition to funding, the Foundation offers partners a range of resources to de-risk CF drug discovery and development. This includes access to a robust community of leading academic researchers, preclinical CF-related model systems and noncommercial research tools, infrastructure for preclinical development, and the world’s largest network of CF clinical trial sites. Additionally, consulting advice on trial design is supported through the Therapeutics Development Network Coordinating Center.

Two-Part Application Program
In order to ensure a proposed program is consistent with our goals and needs, Companies and/or investigators who seek support through the Path to a Cure initiative should contact the CF Foundation to discuss the research program and its applicability to the program. This may be followed by submission of a Letter of Intent (LOI) in advance of a full funding application. In rare occasions when a program has already been extensively discussed with the CFF, applicants may be able to by-pass the LOI with prior approval from the CFF Grants and Contracts Office.

III. Funding Amounts
The level of awards given through the Path to a Cure initiative will vary depending on a specific proposal but the PTAC program expects some awards to be substantially higher than those made for standard CFF industry TDAs; up to tens of millions of dollars. The structure of CFF’s investment in the program is also flexible and may include milestone-based payouts similar to the TDA program, equity investment, or other strategies beneficial to both parties. Contract terms are negotiated prior to finalization of the agreement.

IV. Eligibility
- Both U.S.-based and non-U.S. based (i.e. international) companies engaged in research and development are welcome to apply.
- Awards may be made for either discovery, platform development for gene delivery and editing strategies, and preclinical and/or clinical development activities that support development of treatments that address the underlying cause of CF.
- It is recommended that projects be conducted in consultation with CF scientists/investigators knowledgeable in the specific aspects of the project.
- Approved awards will be subject to monitoring by a Project Advisory Group (PAG), whose membership is approved by CFF. If applicable, the PAG will determine overall performance of the project. If applicable, the PAG will report, in writing, to CFF on a periodic basis determined at the time of contract negotiation.
Milestone completion and subsequent funding, if applicable, may be dependent on the PAG’s review and approval.

Financial Return to CFF
If a Path to a Cure award leads to the development of a new therapy, drug, product or technology that is marketed or meets certain other specified milestones, CFF may receive a financial return for its award. The specific terms of any such financial return will be negotiated and agreed upon prior to finalizing the award and are generally dependent on factors such as the stage(s) of development that is(are) funded, and the magnitude of the award.

V. Mentorship Requirements

Not applicable to this RFA

VI. Goals of Research Currently of Interest to CFF/Priority Areas

Path to a Cure Research Areas of Interest and Priority areas include but are not necessarily limited to the following:

- Preclinical
  - Identify viable readthrough compounds and other strategies to support development of treatments for people with nonsense mutations.
  - Platform development for gene delivery and editing strategies
- Targets
  - Develop methods to target appropriate cell(s) in the lung, GI tract, and other tissues affected by CF that can be used for CF genetic-based therapies.
- Delivery
  - Develop vectors that efficiently target and deliver nucleic acid cargo to the correct cells in the correct tissue without inducing an immune response (allowing for re-administration).
- Editing
  - Develop effective gene editing methods, amenable to clinical development, to correct mutations in the CFTR gene.
- Clinical Studies
  - Advance treatments to the clinic with a high potential to benefit people with CFTR nonsense and rare mutations that are not correctable by CFTR modulators.

Any commercial programs developing therapies or therapeutic platforms with the potential to advance these goals will be seriously considered. The amounts of awards provided through the Path to a Cure Initiative are expected to be substantially higher than those through the CFF Therapeutics Development Award (TDA) program (https://www.cff.org/Research/Researcher-Resources/Awards-and-Grants/Research-Awards/Industry-Funding-Opportunities/). Contract terms will be negotiated prior to finalization of any agreement.

VII. Review and Award

Applications will be evaluated based on the following:

- The soundness and technical merit of the proposed approach.
- The qualifications of the Company Leadership, Principal Investigator (PI), supporting staff and CF collaborators.
- The relative importance of the proposed intervention to CF care.
- The potential of the proposed research for commercial application.
- The appropriateness of the budget requested.
- The adequacy and suitability of the facilities and research environment.
CFF will notify applicants once a funding decision has been made [with a goal of within four (4) months after receiving a full funding application]. Applications received in October or later are unlikely to obtain approval within the same calendar year. All successful awardees will be required to execute an agreement specifying the Terms & Conditions of an award before funds are made available.

VIII. Submission Information

A Letter of Intent (LOI) must be submitted and approved prior to submitting a Full Application

Submit online through http://awards.cff.org
(Refer to Section X of these guidelines for specific submission instructions)

An application will be considered incomplete if it fails to comply with the instructions, or if the submitted material is insufficient to permit adequate review. CFF reviews applications electronically, and only documents submitted online at http://awards.cff.org will be reviewed.

General Timeline:
- LOI Submission Deadline: Rolling
- LOI Applicant Notified: Generally within 2 weeks of receipt
- Full Application Deadline: Rolling
- Review: Ad-hoc basis
- Full Application Notification: Funding decision goal of 4 months after receipt
- Project Start Date: As agreed upon

IX. Letter of Intent Guidelines

LOIs Submission Deadline: Rolling

Submit online through http://awards.cff.org

Documents should be typed using:
- Font: Times New Roman 12 or Arial 11
- Margins: No less than a half inch on each side

To login, please visit: https://awards.cff.org

For all first-time applicants in the new Grants Management System, we ask that you pre-register to create a username and password for “http://awards.cff.org” and complete a profile prior to submitting an application. We also request that as you begin your application, you enter the title of your project, if available. If you are registered and cannot remember your password, click on the “Forgot Password?” link below the “Login” fields.

Once logged in, the award opportunities, including this Request for Applications (RFA), will be listed in the Funding Opportunities tab on the opening screen.

Locate the listing for the “Path to a Cure (PTAC) Industry Award with LOI 2021” program. Click on the “Apply” button in the column on the far right to open the application form.
Applicants may stop at any point but must click the “Save” button at the bottom of each page before exiting in order to save their progress. When you wish to return to your draft application, please do not go through the “Funding Opportunities” tab. Instead, go to the “My Applications” tab in the right corner of the main page. When you are in the “My Applications” tab you will be able to find all your draft applications by clicking on the “Draft Applications” module.

The following sections are displayed as tabs across the application screen. Click on each section and follow the directions. Click “Save” as you complete each section.

**GENERAL**
Enter the title of your project, enter the project start and end dates, select the number of periods being requested, and complete any additional questions.

**CONTACT PROFILE**
If a profile was completed upon registration, the fields in this section will already be populated with the information entered in your Professional Profile. If you need to make any changes, you may update your profile in this section. Once updated you must “Save and Validate” prior to returning to continue your submission.

**INSTITUTION**
If a profile was completed upon registration, the applicant’s/principal investigator’s institution will be preloaded as the Lead Institution. Domestic applicants must verify their institution by entering the Employer Identification Number (EIN) or Tax Identification Number (TIN) to search the system for the correct institution. If the EIN/TIN is not located, you may add the legal institution. Please also confirm if the project site is the same as the legal institution.

**Verification of Applicant Institution’s Tax Status (upload as PDF documents):**
The CFF Grants and Contracts Office must have a copy of the applicant institution’s current W-9 and 501(c)3 letter, or other documentation verifying its Federal tax status and will not issue Award Letters to Awardees if these documents are not received and on file.
- Applicants from for-profit organizations must submit a copy of the applicant institution’s W-9 and IRS documentation verifying the organization’s Federal tax status. Awards are not issued prior to having these documents on file with the CFF Grants and Contracts Office.
- Non-U.S. applicants must provide a copy of the W-8BEN-E form (required). In addition, a tax equivalency letter should be uploaded, if available. If a tax equivalency letter is not available, applicants must upload a letter stating this documentation is not available.

**CONTACTS**
Please note: The INSTITUTION tab must be completed prior to adding internal contacts to ensure that the contacts are properly associated with the applicant institution.

Complete the required contact fields by searching by name for existing contacts at your institution for each role. If the desired institutional contact is not available in the system, you may select “Add Internal Contact” to create a basic contact profile in order to add the individual to your application. Additional optional contacts not associated with the applicant institution may also be added. These contacts would be considered as additional contributors involved in the proposed research plan. These may include consultants, collaborators, or subcontractors. If the desired external contact is not available in the system, you may select “Add External Contact” to create a basic contact profile in order to add the individual to your application.
ABSTRACTS/RELEVANCE

In the space provided online for abstracts, provide a statement of no more than 2,000 characters (including spaces) explaining the subject of the research proposal and its relationship to CF. Two different abstracts are required, as follows:

- **Lay Abstract**: This statement will be used to inform the non-scientific departments of CFF and the general public of the nature of this work. Applicants should not include any confidential or proprietary information, including intellectual property, in the lay abstract.
- **Scientific Abstract**: This statement will be used to inform the scientific community.
- **Summary of Relevance to CFF mission**: All applications are reviewed and scored not only on scientific merit but also on relevance to CFF’s mission:

  *The mission of the Cystic Fibrosis Foundation is to cure cystic fibrosis and to provide all people with CF the opportunity to lead long, fulfilling lives by funding research and drug development, partnering with the CF community, and advancing high-quality, specialized care.*

Provide a statement of no more than 3,000 characters (including spaces) summarizing the relevance of the proposed research to the health and well-being of CF patients, for a scientific audience who may or may not have a background in the subspecialty of the proposed research.

BUDGET

Select the “Open” button under the Budget tab and complete the relevant budget categories for each year of funding. Fill in the applicable amounts for each year of support requested by completing the online fields (Period 1, 2, 3, etc.). **Total FTE costs may not exceed US$275,000 per person per year. Note: Matching funds are required and should be indicated in the Total Costs of the Project.** CFF will not provide funds for travel of employees of applicant institution; however, travel of key personnel to CF-related scientific meetings can be considered as matching funds. **Note: Matching funds are required for this program, however, at the LOI stage, the budget should reflect funds requested from CFF only (not any company matching funds). If invited to submit a full application, the budget will need to include the company matching funds.**

Be sure to click “Save” prior to closing the budget window.

LOI UPLOADS

Download the available templates applicable to the project, upload the completed templates in PDF format to the corresponding attachment types within this section. Templates available for download include:

- Biographical Sketches for Key Personnel
- Opportunity Summary Form

BIOGRAPHICAL SKETCH(ES) OF KEY PERSONNEL (NIH TEMPLATE AVAILABLE FOR DOWNLOAD)

Complete and upload an NIH Biographical Sketch for all key project personnel, beginning with the Applicant/Principal Investigator. International applicants can upload a biosketch that is equivalent in content to the NIH template provided. (CFF defines “key personnel” as any individual with an advanced degree that will play an instrumental role in the accomplishment of the research project.) Do not exceed five (5) pages per person.

OPPORTUNITY SUMMARY FORM

Complete the brief summary of your potential CF opportunity using the provided template. There is a five-page limit to your summary; please do not exceed the limit.
Submission

Prior to selecting “Sign & Submit”, please complete a thorough review of the entire LOI. The “Sign & Submit” button will trigger validation on all required fields and identify any errors.

X. Full Application Guidelines

Full Application Deadline: Rolling

Full applications for support of these projects will only be accepted if the applicant has an approved Letter of Intent (LOI) on file with CFF or has been invited to bypass the LOI stage. Notifications of LOI approval are sent via email from the CFF Grants and Contract Office. Once an applicant has been notified that the LOI was approved, applicants can access and complete the full application by logging in at https://awards.cff.org.

Applications must be submitted online at https://awards.cff.org

Documents should be typed using:
- Font: Times New Roman 12 or Arial 11
- Margins: No less than a half inch on each side

Note: When all the documents have been uploaded to awards.cff.org, the system will compile them into a single PDF file. You may preview this file by selecting “Application Full Print”, as well as exporting the compiled PDF file.

Your draft Full Application will be listed under “My Applications”, then within the “Draft Applications” section. Upon locating the draft application, you may select it to begin your submission.

Applicants may stop at any point but must click the “Save” button at the bottom of each page before exiting in order to save their progress. When you wish to return to your draft application, please do not go through the “Funding Opportunities” tab. Instead, go to the “My Applications” tab in the right corner of the main page. When you are in the “My Applications” tab you will be able to find all your draft applications by clicking on the “Draft Applications” module.

The following sections are displayed as tabs across the application screen. Click on each section and follow the directions. Click “Save” as you complete each section.

Please note: Only select the “Submit to AIO” button after the application has been fully completed. This will trigger validation on all required fields and send the application to your Authorized Institutional Official “AIO” for review and signature.

GENERAL

Enter the title of your project, enter the project start and end dates, select the number of periods being requested, and complete any additional questions.

CONTACT PROFILE

If a profile was completed upon registration, the fields in this section will already be populated with the information entered in your Professional Profile. If you need to make any changes, you may update your profile in this section. Once updated you must “Save and Validate” prior to returning to continue your submission.
INSTITUTION

If a profile was completed upon registration, the applicant’s/principal investigator’s institution will be preloaded as the Lead Institution. Domestic applicants must verify their institution by entering the Employer Identification Number (EIN) or Tax Identification Number (TIN) to search the system for the correct institution. If the EIN/TIN is not located, you may add the legal institution. Please also confirm if the project site is the same as the legal institution.

Verification of Applicant Institution’s Tax Status (upload as PDF documents):
The CFF Grants and Contracts Office must have a copy of the applicant institution’s current W-9 and 501(c)3 letter, or other documentation verifying its Federal tax status and will not issue Award Letters to Awardees if these documents are not received and on file.

• Applicants from for-profit organizations must submit a copy of the applicant institution’s W-9 and IRS documentation verifying the organization’s Federal tax status. Awards are not issued prior to having these documents on file with the CFF Grants and Contracts Office.
• Non-U.S. applicants must provide a copy of the W-8BEN-E form (required). In addition, a tax equivalency letter should be uploaded, if available. If a tax equivalency letter is not available, applicants must upload a letter stating this documentation is not available.

CONTACTS

Please note: The INSTITUTION tab must be completed prior to adding internal contacts to ensure that the contacts are properly associated with the applicant institution.

Complete the required contact fields by searching by name for existing contacts at your institution for each role. If the desired contact is not available in the system, you may select “Add Contact” to create a basic contact profile in order to add the individual to your application. You may add any additional relevant contacts within this section. Roles and access for each role is specified within the online application portal.

ABSTRACTS/RELEVANCE

In the space provided online for abstracts, provide a statement of no more than 2,000 characters (including spaces) explaining the subject of the research proposal and its relationship to CF. Two different abstracts are required, as follows:

• Lay Abstract: This statement will be used to inform the non-scientific departments of CFF and the general public of the nature of this work. Applicants should not include any confidential or proprietary information, including intellectual property, in the lay abstract.
• Scientific Abstract: This statement will be used to inform the scientific community.
• Summary of Relevance to CFF mission: All applications are reviewed and scored not only on scientific merit but also on relevance to CFF’s mission:

The mission of the Cystic Fibrosis Foundation is to cure cystic fibrosis and to provide all people with CF the opportunity to lead long, fulfilling lives by funding research and drug development, partnering with the CF community, and advancing high-quality, specialized care.

Provide a statement of no more than 3,000 characters (including spaces) summarizing the relevance of the proposed research to the health and well-being of CF patients, for a scientific audience who may or may not have a background in the subspecialty of the proposed research.

BUDGET

Select the “Edit Budget” button under Application Budget, to enter and begin completion of the application’s budget detail for each year of funding being requested. The CFF PTAC dollars must be matched at least one-to-one; however, greater contributions of company funds are acceptable. Matching funds may include activities such as: Travel of key personnel to CF related scientific meetings; Chemistry Manufacturing and
Controls; Costs associated with normal human volunteer trials. **Note:** Matching funds are required and should be entered in the “Total Matching Costs” field at the bottom of the page.

**The following budget categories are offered under this program:**

**Salary & Benefits** - For this program CFF allows FTE costs (requested from the CFF portion of the budget), of up to US$275,000 per person per year. List the names and positions of all professional and non-professional personnel involved in the project, whether or not salaries are requested. Indicate the percent effort on the project for all personnel. For each individual, be sure to complete all fields on the Budget Detail in full on the template provided. Fringe benefits may be requested if they are treated consistently by the applicant institution as a direct cost to all funding agencies and foundations.

**Consultant Expenses** - Give the name and institutional affiliation of any consultant who has agreed to serve in this capacity, including statisticians and physicians in connection with patient research costs if they are not listed under personnel. Under budget justification, briefly describe services to be performed, the number of days, rate of compensation, per diem and any other associated costs.

**Patient Research Expenses** – Funds may be requested for patient research costs specifically related to the proposed research and not considered routine care. The basis for estimating funds requested in this category should be justified and applicants must provide detailed information regarding the proposed costs (e.g., number of procedures, cost per procedure, ancillary costs). The scientific need for patient research costs will be considered in the review. Negotiation of these costs are between the applicant institution and the service provider.

If approved as part of the application, patient research costs are capped at the amount requested in the budget and under no circumstances is CFF or CFF responsible for any costs that are later determined non-covered by third party insurers. Applicants and applicant institutions acknowledge that CFF is solely a provider of funding for the research performed under an approved award and not a sponsor of the research as defined by the FDA (21 CFR §312.3(b)).

**Consumable Supplies** – Itemize supplies e.g. disposables, reagents, chemicals, animals, in separate categories and give the estimated cost of each category. If animals are involved, state the number, unit purchase cost, and unit care cost.

**Major Equipment** - List all items of equipment greater than $5,000 requested and the cost of each item. If funds are requested to purchase equipment that is equivalent to items listed under “Facilities Available”, justify the duplication. Justify any item of equipment for which the need may not be obvious.

**Other Expenses** - Itemize other expenses by major categories such as duplication costs, publication costs, Data Safety Monitoring Plan (DSMP) related-expenses (if applicable), computer charges, equipment maintenance, etc. Justify all items.

**Subcontractor Summary** – If applicable, detailed budgets for each subcontract, including indirects, must be provided for each year of support. Subcontractors are added in the prior section entitled “Application Contacts”. The lead/prime applicant PI can initiate/complete the subcontract budget directly, place it in “Pending PI Acceptance”, as well as “Submit” the subcontractor budget to be included as part of the application. 

**Please note:** the subcontractor budget cannot be edited once the “Submit” button is selected.

After identifying subcontractors, the lead applicant/prime PI is able to edit the subcontractor budget prior to choosing “Submit”. Please ensure that the subcontractor budget is complete and accurate prior to
accepting/submitting. **Please note:** the subcontractor budget cannot be edited once the “Submit” button is selected.

**Budget Detail – Indirect Costs**
Indirect costs are not allowable.

**LOI UPLOADS**
This section will allow access to the documentation uploaded at the LOI stage.

**FULL APPLICATION UPLOADS**
Download the available templates applicable to the project, upload the completed templates in PDF format to the corresponding attachment types within this section. Templates available for download include:
- Budget Justification
- Research Plan
- Biographical Sketch(es) of Key Personnel
- Data Safety Monitoring Plan (if applicable)
- Facilities Available
- International Institution Form (if applicable)
- Critique Response (if applicable)

**BUDGET JUSTIFICATION**
Describe costs listed in the Budget Detail. Use major categories, such as Salary & Benefits, Consultant Costs, Major Equipment, etc. Justify all items and make sure amounts and figures listed in the narrative are consistent with those listed in the Budget Detail(s).

**RESEARCH PLAN**
*Page limit: Thirty (30) single-sided pages, including the Literature Cited. Applications exceeding this page limit will not be reviewed. Type the PI’s name in the space available in the header of the document. The template available will track page numbers at the bottom.*
- Each Component (if applicable) must be clearly identified within the Research Plan.
- Applications with a Clinical Phase must include a Data Safety Monitoring Plan (DSMP). For additional details, please see the information provided below.
- Include sufficient information to permit effective review without reference to previous applications. Information should be presented in a clear, concise manner, while being specific and informative.

a. **Hypothesis, Specific Aims and Milestones Outline:** State concisely and realistically the intent of the proposed research and the hypothesis to be tested. Milestones must be outlined and a timetable for the completion, based upon the requested period of support, must be outlined.

b. **Significance:** Briefly describe the background of the present proposal. Critically evaluate existing knowledge and specifically identify the gaps which the project is intended to fill. Specifically, discuss the unmet need the therapeutic intends to fill and its projected impact on CF patient survival, pulmonary exacerbations (duration and/or frequency and CF patient quality of life in the context of existing and emerging CF therapies). Concisely state the importance and rationale of this research by relating the specific aims to longer-term objectives. This section should also show the potential importance of the proposed work to the development of new therapies for CF patients.

c. **Experimental Design, Methods and Milestones:** Describe the protocols, including methods for new techniques, and explain potential advantages over existing methodologies. Discuss the data expected to be obtained and the means by which data will be analyzed and interpreted. If clinical studies are involved, provide details of the methods for patient selection and care. Discuss potential difficulties and/or limitations of the proposed procedures and alternative approaches to achieve aims. Point out any
procedures, situations or materials that may be hazardous to personnel or patients and the precautions to be exercised. Applications will be reviewed and evaluated based upon the experimental design and methods used to achieve the desired outcomes/milestones.

d. **Consultant Arrangements**: If the proposed project includes consultant arrangements and/or collaboration with other individuals outside the applicant’s group, describe the working relationships and support this description by letter(s) of intent signed by collaborating individual(s). In addition to letters of collaboration, curricula vitae must also be provided. If clinical material required by this award is to be furnished by other individuals, include a statement from these individuals agreeing to their participation. All applications must include the name, biosketch, and a letter of support from a CF-identified investigator representing a CFF-accredited Center, CF-supported Therapeutic Development Center, or other funded mechanism by the CFF.

e. **Literature Cited**: References should be numbered in the sequence that they appear in the text and listed at the end of the Research Plan. Each citation must include the names of authors, the name of the journal or book, volume number, page number and year of publication (titles are optional).

**BIOGRAPHICAL SKETCH(ES) OF KEY PERSONNEL**

Complete and upload an NIH Biographical Sketch for all key project personnel, beginning with the Applicant/Principal Investigator. International applicants can upload a biosketch that is equivalent in content to the NIH template provided. (CFF defines “key personnel” as any individual with an advanced degree that will play an instrumental role in the accomplishment of the research project.) Do not exceed five (5) pages per person.

**DATA SAFETY MONITORING PLAN**

In compliance with Federal regulations, all applicants must submit a general description of the Data Safety Monitoring Plan (DSMP) for any proposed study that places human subjects at more than minimal risk. A DSMP helps to ensure subject safety, as well the validity and integrity of the data. Furthermore, a DSMP allows for the monitoring of study data to assess whether or not an early termination is necessary for safety or efficacy reasons.

The extent of monitoring required for a study is dependent on the level of risk involved for the subjects, as well as the size and complexity of the study. Large, multi-center CFF-funded interventional clinical trials may be required to utilize a Data Safety and Monitoring Board (DSMB). In addition, because its members are CF clinicians and clinical trial experts, CFF strongly encourages and may require that investigators utilize the CFF DSMB for any other interventional CF clinical trial that meets one or more of the following criteria:

- Multi-center;
- Randomized;
- Conducted in an emergency setting;
- Use high-risk interventions, such as gene therapy, gene transfer, or bronchoscopy;
  or
- Include particularly vulnerable study populations, such as pediatric patients.

**Note**: On the available template, please check whether a DSMP is required and upload the template regardless of the response.

**Address the following areas in the DSMP:**

**Assessment of Risk** – Describe the level of risk the proposed research presents to subject participants and provide a detailed justification for the level of risk. Discuss who will monitor the study.

**Level of Risk**

- Minimal Risk
  - Study poses no more risk than expected in daily life (blood draw, physical exam, etc.)
• Observational studies
  • Survey or questionnaire studies

• Low Risk
  • Post-marketing study Phase IV drug or device, as defined by FDA

• Moderate Risk
  • Substantial risk (>5%) of a Serious Adverse Event (SAE) originating from the underlying condition of the enrolled subject
  • Phase I or II study with available safety data in humans

• High Risk
  • Involves an intervention or invasive procedure with substantial risk
  • Involves the use of a new chemical or drug for which there is little or no toxicology data in humans
  • A gene therapy study or research involving recombinant DNA or RNA molecules (gene transfer)
  • Involves vulnerable populations (pediatric, pregnant, etc.)

**Anticipated Adverse Events and Grading Scale** – Describe anticipated adverse events (AEs), including expected frequency and the grading scale to be used. Discuss plans for addressing AEs.

**Reporting of AEs** – Detail the plan for reporting AEs, including who shall be notified in the event an AE should occur.

**Safety Monitoring Plan** – Describe all tests, evaluations, and exclusion criteria that will be implemented to ensure and monitor the safety of human subjects. Discuss stopping rules for the study subjects or for the overall study if necessary.

**Safety Reviews** – Describe the process for monitoring and reviewing subject safety data, including the frequency of such reviews. Include details as to who will perform the monitoring and plans for reporting. If utilizing the CFF DSMB, provide the frequency of meetings, the reporting requirements, including AEs and SAEs, and the procedure for interim reporting as necessary. If this information is not available at the time of submission of the application, note that CFF will not release awarded payments until it is provided.

**Registrations for Investigator-Initiated Clinical Trials:**
  • [Clinicaltrials.gov (United States)](https://clinicaltrials.gov): Applicants are required to register all non-exempt human subject studies in the ClinicalTrials.gov database to ensure information is freely available on CFF-funded trials within the community. The registration should be no later than twenty-one (21) days after the first subject is enrolled. CFF requires copies of documentation confirming this registration, when applicable.
  • [EudraCT Registration (European Union)](https://www.clinicaltrialsregister.eu): For interventional clinical trials with medicinal products conducted in the European Union, the Institution must provide documentation to CFF confirming registration of the clinical trial when applicable.

**FACILITIES AVAILABLE**
Describe the facilities and equipment available at the applicant’s institution that will be used for this project, such as laboratory, clinical, animal, computer, office, etc. Provide any additional information about the environment, including any support services available that will be utilized. Describe their pertinent capabilities, proximity and anticipated extent of use. If facilities or equipment at a consultant’s or collaborative site will be used, they should be identified and clearly described. There is no page limit. Use continuation pages, if necessary.

**INTERNATIONAL INSTITUTION FORM (IF APPLICABLE)**
Applicants whose organization/institution is not a United States based-entity must complete the International Institution Form. **Upload a PDF version of the completed and signed form, together with the following documents***:
• A copy of the institution’s most recent Mission Statement.
• A copy of the institution’s tax status documentation or equivalent, or a letter stating it is not available.
• A brief description of other sources of support, such as official awards, private endowments, and commercial activities, received by the institution.
• A copy of the institution’s Standard Operating Procedure(s) or relevant policy to ensure that funds provided are neither distributed to terrorists or their support networks, nor are funds used for activities that support terrorism or terrorist organizations.
• For-profit institutions must submit a complete list of key employees, members of the governing board, and/or other senior management.

Applicants who have provided these documents within the past three (3) years are not required to resubmit them. However, if any of the above documents have been updated since they were previously submitted, please upload any updated documents. The CFF Grants and Contracts Office will contact applicants if documents are outdated or missing.

*Applicants must provide English translations for all non-English documents, including material provided in support of the Research Plan.

CRITIQUE RESPONSE (IF RESUBMISSION)
If the application is a resubmission of a previously declined application, please provide a point-by-point response to the prior reviews. There is no page limit to your responses, but please be concise and succinct.

APPENDICES
Appendices are restricted to the following categories:
• Certification of organization assurances (i.e. IRB, IACUC and IBC approvals), if applicable
• Up to four (4) reprints of the applicant’s work relating to the general area of research in the proposal
• Letters of reference, support, and/or collaboration, including a letter of support from a CF-identified investigator representing a CFF-accredited Center, CF-supported Therapeutic Development Center, or other funded mechanism by CFF
• Other materials pertinent to the proposal, not already described. Please upload only the most relevant documents, as excessive materials may not be reviewed.

*Organization Assurances & Certifications
CFF requires, as applicable, that all U.S.-based awardees obtain Institutional Review Board (IRB) approvals for human subject research, Institutional Biosafety Committee (IBC) approval for recombinant or synthetic nucleic acid research, and Institutional Animal Care and Use Committee (IACUC) approval for animal research, (see additional information regarding these approvals below). Copies of these approvals, if available at the time the application is submitted, must be uploaded with the application as appendices. CFF will not release payments to awardee institutions until these documents are received and on file with the CFF Grants and Contracts Office.

Awardees based outside of the U.S. must comply with the applicable equivalent regulations in their respective countries and provide copies of approvals as soon as they are available. CFF will not release payments until these documents are received and on file with the CFF Grants and Contracts Office.

Research Involving Human Subjects: CFF policy pertaining to the protection of individuals as research subjects requires that for each proposal awarded, the awardee institution certify in writing that an Institutional Review Board (IRB) has reviewed and approved the procedures for the use of human subjects, or human organs, tissues and body fluids, in the proposed research, in accordance with the Department of Health and Human Services policies found at https://www.hhs.gov/ohrp/regulations-and-policy/index.html.
In the event the IRB has determined a study is exempt, documentation demonstrating the exempt status must also be submitted to the CFF Grants and Contracts Office.

**Research Involving Recombinant or Synthetic Nucleic Acid Molecules:** All research involving recombinant or synthetic nucleic acid and human gene transfer studies supported by CFF must meet the requirements contained in the document *NIH Guidelines for Research Involving Recombinant or Synthetic Nucleic Acid Molecules (updated April 2019).* This publication and announcements of modifications and changes to the NIH Guidelines are available from the Office of Science and Policy, National Institutes of Health, 6705 Rockledge Drive, Ste 750, MSC 7985, Bethesda, MD, 20892-7985 or online at https://osp.od.nih.gov/wp-content/uploads/NIH_Guidelines.pdf.

**Research Involving Animals:** Applications submitted to CFF involving the use of animals must meet the guidelines of the National Institutes of Health found at https://grants.nih.gov/grants/olaw/olaw.htm, which require that all proposed studies be reviewed and approved by an Institutional Animal Care and Use Committee (IACUC). In addition, CFF awardee institutions and laboratories must be accredited by the American Association for Accreditation of Laboratory Animal Care (AAALAC) and/or have other verifiable assurances that the institution and laboratory meet appropriate standards.

### Validation and Submission

Prior to selecting “Sign & Submit to AIO”, please complete a thorough review of the entire application. The “Sign & Submit to AIO” button will trigger validation on all required fields and identify any errors. Upon submission the ability to edit the application will be locked pending review and approval by your AIO.

**XII. Contact Information**

**For technical support with the online application:**
Primary CFF Grants and Contracts contact mromeo@cff.org or 301-841-2614  
Secondary CFF Grants and Contracts contact nmohaghegh@cff.org or 301-841-2614

**For program/content information:**
Lindsey Beaman lbeaman@cff.org or 240-200-3780  
Maria Wang mwang@cff.org or 240-200-3777
