

BALF Biorepository (Zemanick) (ZEMANI11A0)

Specimen Information

Status: Specimens are Available

BALF samples were collected from patients at the time of clinically indicated bronchoscopy and BAL. Samples were planned to be collected from 180 CF patients and 45 Disease Control patients. BALF samples were frozen neat at -70 Celsius. Patient information was collected at the time of BAL including: age, gender, diagnostic information (sweat chloride, genotype), pancreatic status, co-morbidities, indications for bronchoscopy, pulmonary exacerbation score, recent antibiotic use and concomitant medications , recent lung functions, airway culture results from previous 2 years, and BALF cell count and culture results.

Visit #	Time From Baseline	Specimens Collected
1	+0 Days	BAL

Study Design

Study Type?	Observational
Randomized Study?	No
Placebo Controlled?	No
Length of Participation	1 Days
Number of Study Visits?	1

Additional Information

Phase?	Not Applicable
Study Sponsor?	Zemanick, Edith
Study Drugs?	N/A

Eligibility

Age	2 Months to 50 Years
Mutation(s)	No Mutation Requirement
FEV1% Predicated	No FEV1 Limit
PA Status	Not Applicable
Other	Clinically indicated bronchoscopy and bronchoaveolar lavage.
