

CFF Metabolomic Biomarkers (SAAVED09A0) (SAAVED09A0)

Specimen Information

Status: Specimens are Available

The goal of this study was to collect a single specimen for banking from 30 CF subjects in a clinically stable state. The samples collected were from subjects who had been fasting for at least four hours. Additionally samples were collected from age matched healthy controls.

Visit #	Time From Baseline	Specimens Collected
1	+0 Days	EDTA plasma

Study Design

Study Type?	Observational
Randomized Study?	No
Placebo Controlled?	No
Length of Participation	1 Days
Number of Study Visits?	1

Additional Information

Phase?	Not Applicable
Study Sponsor?	Saavedra, Milene
Study Drugs?	N/A

Eligibility

Age	18 Years and Older
Mutation(s)	No Mutation Requirement
FEV1% Predicated	No FEV1 Limit
PA Status	Not Applicable
Other	Subjects must have one deltaf508 allele.
