

# 2023 IN FOCUS

**IN 2023**, the Cystic Fibrosis Foundation made real progress toward our mission to cure CF and provide all people with CF the opportunity to lead long, fulfilling lives. We helped make it possible for the first cystic fibrosis genetic therapies to reach clinical trials, for more people to access transformative treatments, and for CF community members to connect and support each other. **Together, we made a difference.**

### STEPH | 34

I'm here today because I've decided not to let the challenges of CF and being in the [percentage of people without modulators] diminish my sense of hope. What fuels that hope is knowing that I have an unstoppable force — my loved ones, my incredible CF care team, and this Foundation — rallying behind me every step of the way.
