**BONUS - Healthy Matched Controls**

**Specimen Information**

*Status: Specimens are Not yet available, anticipated May, 2014*

Families will be requested to collect and urine and stool at designated time intervals that would correlate with routine healthy infant visits at 2, 4, 6, 9, and 12 months of age. Urine and stool metabolomics will be analyzed and if consent is given the specimens will also be banked.

**Study Design**

- **Study Type?** Observational
- **Randomized Study?** No
- **Placebo Controlled?** No
- **Length of Participation** 10 Months
- **Number of Study Visits?** 4

**Additional Information**

- **Phase?** Not Applicable
- **Study Sponsor?** Gelfond, Daniel
- **Study Drugs?** N/A

**Eligibility**

- **Age** 1 Months to 3 Months
- **Mutation(s)** No Mutation Requirement
- **FEV1% Predicated** No FEV1 Limit
- **PA Status** Not Applicable
Subjects are recruited from a 2 month healthy infant visit at a community pediatric center. Eligible subjects must have a negative newborn screening test for cystic fibrosis.

**Study Results**
